

## **OUR VISION:**

Make South Carolina the freest, most citizen-first, self-governing state in America. A place where government is weak, citizens are strong and the covenant between God and the citizen is restored on the eve of our 250th anniversary.

### **RETURN POWER TO THE CITIZEN- SEPARATION OF POWERS**

- Support legislation allowing the Governor to appoint 8 members of the JMSC.
- Phase 2: Constitutional amendment to implement retention elections (yes/no for new term) for judges and eliminate JMSC.
- End DEI criteria and executive session interviews for judicial appointments.
- The Governor, not commissions and boards, hires and fires agency heads who execute the laws. Start with all major agencies.
- Revolving 5-member constitutional commission in the Governor's office. All laws must be approved by the commission before implementation.

### **RETURN MONEY TO THE CITIZEN**

- Re-purpose 25,000 agency jobs to the private sector and consolidate agencies.
- Eliminate half of the state's 84,000+ regulations using AI tools already developed.
- Require annual AI forensic audits of all agencies including municipalities/schools that receive state funds.
- Establish a Citizen Trust Fund (CTF) to return surplus funds to taxpayers every July 4 and December 25.
- Eliminate the state income tax when CTF rebates are sustained. Reform 110 sales tax exemptions and review elimination of property tax on cars/boats.

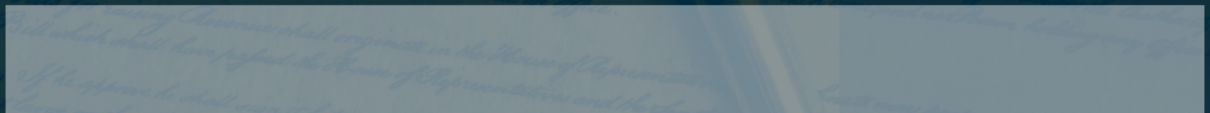

### **USE GOOD AI TO OVERHAUL/REFORM GOVERNMENT**

- Recognize there is "good AI" and "bad AI" just like good internet and bad internet.
- Good AI focuses on "super analyst" and customer service capabilities. We must have a bold vision of the future and not be intimidated by it. Embrace good AI to re-engineer Government.

### **ADVANCE PHASE 1 OF POLICY REFORM NOW**

- "Through the eyes of a child" education initiative to get us to top 20 K-12 in 4 years- Start fixing governance by eliminating the Education Oversight Board, reforming pre-emption so the state, not local school boards, dictate education policy; reduce administrators by one half by tying state funding to pre set administrator ratios; teacher pay tied to student performance on 3 progressive tests per grade. Adopt 2 hours per week of AI based learning in math, science and English being piloted by DOGESC in Edgefield County.
- Death penalty for violent crimes against children.
- Finally fix the roads - start with governance by eliminating the 9 member commission and making the Sec of Transportation, a Cabinet position appointed by Governor; shift from two third state managed roads to one third in 4 years; eliminate in house road maintenance and bid jobs in 6 districts with DOT oversight using AI to monitor schedules and efficiency; cut SCDOT staff by 50 percent.
- Eliminate all DEI criteria in hiring/contracting in DOT and use AI to cut permitting times by 75 percent.

**A DOGESC INITIATIVE**

**THIS IS PHASE 1 OF A MULTI-PHASE PLAN AND WILL NOT BE COMPLETE UNTIL THE WEAPONIZATION OF GOVERNMENT AGAINST THE CITIZEN HAS ENDED.**
